Inspection Memo  
to File:

RE: Damian/Poor Boy Mine  
Diatex, Inc.  
ACT/019/011  
Grand County, Utan

The above-mentioned mine operation was briefly visited by Tom Tetting and Sandy Pruitt of the Division. The existing disturbance may exceed two acres (including roads). No new developments were detected but equipment remains on-site. The initial adequacy review dated June 15, 1981, was returned to the Division in September 1981, with no forwarding address available. Mr. Leo Lemay's phone number is (403) 286-3566. Residents there told me that Mr. Lemay could be contacted at 201 Silver Ridge Close, Calgary, Alberta, Canada T3B 3T3. The original June 15, 1981, letter was sent to this address as an enclosure to a Registered letter requesting information on Diatex's new situation and plans for the mine. A prompt reply was requested.

In a reply received by Jim Smith on February 18, 1982, Mr. Lemay informed DOGM that he quit Diatex in July 1981. Damian and Diatex folded in fall 1981, in both the United States and Canada. Problems with the Corps of Engineers could not be resolved so they were forced to shut down operations. Frank Downey is the former company president and can be contacted at 3131 Upper Place, Calgary, Alberta, Canada. All property and equipment belongs to Bob Barnes, the claim owner.
